Convocation Address By The Chief Guest

Padmashri Dr. Dr. Kamini A. Rao, Founder & Medical Director of Milann, Chairperson of the International Institute for Training & Research in Reproductive Health, Bengaluru in her Convocation address, opined that, despite encouraging trends and marked progress in education for girls, the full advantage of educational opportunities could not be taken largely because of social resistance arising out of fear and misconception. “One cannot cure social prejudice merely by legislation, especially in countries like India, where the government machinery is weak and corruption is rampant.” Men must come to recognize that women’s empowerment is not a threat, but rather a way to improve families and societies.

Student Writes...

I still remember the day, I stepped on the land, which I have been dreaming of for the past two years. It seemed like a paradise on the earth, a beaming ray of sun striking in my eyes, which were tired of the tail of years. The overwhelming sense of my biggest dream, my sole aim was coming true, right infront of my eyes. The sense of gratefulness, for being accepted among the elites, is so high that the feeling is impossible to express in words. Nevertheless, I will give it a toy.

And then, the 'high on life' the life in Shri B. M. Patil Medical College began. (It is completely a different world, where people live to the fullest. You will never find another place like BLDE, even if you do, it will be impossible to find such a supporting professors, non-teaching staffs and a huge crowd). I don't know about the other college, but the first year in B. M. Patil is the best time you would ever have in your life. Seniors of the college are so awesome that I cannot describe the supportive nature of them. During the first interaction with my seniors. I was guild scared but later I began to enjoy it, trust me. It had transformed by personality in unimaginable ways, you won't believe the increase in my confidence level with just one month of this interaction.

1st year is tough, you are in a college and you have just added your entrance exams and spent 2-months doing nothing and it is hard to trick those heavy books up and study, entry into medical college and you are in cloud ring. More than me, my parents at the top of the world. I get to wear that "White apron with my name plate", followed by MBBS student. It is the most wonderful feeling that a medical aspirant can feel.
