SCHOLAR'S WRITE-UP...

I am proud to be a Ph.D. scholar in Medical Physiology of BLDE University. I am thankful to Ministry of Science and Technology, Government of India for being awarding a DST INSPIRE fellowship to pursue full-time Ph.D. in BLDE University. University is not only a place for pursuing education, but also the centre to enrich our life and shape our carrier for future. As our University is having research collaborations with many Universities in the world like Manitoba University of Canada, Emory University of USA, hence, the students of our University are exposed to the latest international development and understanding of medical research. I am fortunate enough to work with dedicated faculty members and renowned scientists of our University.

We are also privileged to take active participation in various CMEs, workshops and conferences which are routinely organized by all the departments of our institution and University. Such CME, workshop and conference provide us an opportunity to interact with some of the who's who in the world of medical sciences. Beside this academic and research environment, we also enjoy the rich cultural and sports activities in our University campus. I am really thankful to my peers of this University, who have given me the knowledge, strength and courage to dare to participate in scientific competition at 9th International Congress of European Union Geriatric Medicine Society held in Italy and being awarded subsequently. I am really proud to be associated with one of the prestigious University of our country, which is a part of BLDE Association - a heritage association of national repute.
