**Value Added Course ; CLINICAL BIOCHEMISTRY LABORATORY :
UTILIZATION & INTERPRETATION**

Target group	(UG/ Internees / PG/Ph.D/Allied group courses etc)
Goal & Objective of the Course	<p>Clinical Biochemistry laboratory is accomplished with automated instruments and produces a large amount of numerical data. The scope for the laboratory to give meaning to these data by interpreting the results is limited by a number of factors including;</p> <ol style="list-style-type: none">1. Lack of knowledge of the context in which the tests were requested, i.e. the clinical question.2. Lack of knowledge of patient factors which may influence the results e.g. Interference of the medication. <p>At the end of the successful completion of this course in, Clinical Biochemistry Laboratory : Utilization and Interpretation; the student will be able to understand about the details of the various aspects involved in smooth running of the lab and interpret biomedical data in the investigation and diagnosis of disease and discuss the origin and effects of an abnormal biochemical profile.</p> <p>The student will also understand how the clinical biochemistry laboratory helps effectively to meet the requirements of the end users by systematic communication between the clinician and laboratory persons</p> <p>Objectives of the course:</p> <ol style="list-style-type: none">1. To understand the lab errors (pre-analytical, analytical and post-analytical).2. To understand the strategy for the acceptance and rejection of samples.3. To learn about importance of quality control.4. To learn about role of Automation in clinical Biochemistry laboratory.5. To understand the various analytical procedures for routine biochemical parameters.6. Reporting and interpretation of results.
