FOUNDER OF THE UNIVERSITY

Dr. M. B. Patil B.E.
President

BIJAPUR LIBERAL DISTRICT EDUCATIONAL ASSOCIATION (BLDEA)

BLDE Association was established in 1910. It is committed to the cause of imparting quality education from primary to university in the backward region of North Karnataka. The Association was nurtured and shaped by great visionaries-Dr. P.G.Halakatti, known as 'Vachana Pitamah' in Kannada Literature, Shri Shri Sanganabasaveshwar Maha Shivayogigalu of Banthanal; a great religious leader, and Dr. B. M. Patil; a great statesman. Presently, the Association is guided by Dr.M.B.Patil; a young and dynamic leader.

BLDE (Deemed to be University)

BLDE (Deemed to be University) came into existence on 29th February 2008 with the sole objective of providing quality Medical Education and meeting the health care needs of the people in this backward region of North Karnataka. Shri B. M. Patil Medical College, Hospital & Research Centre is the only constituent college of the University and was established in the year 1986. It has a unitary campus of 45 acres with 24 departments and a teaching hospital with 1125 beds.

The Institute has been offering; UG Programme-MBBS (with an intake of 150 students), B.Sc. (MIT), PG Programmes in 18 disciplines, M.Sc. (Medical), PG Super Specialty Programme in Urology (M.Ch.), Ph.D. Programme in 14 disciplines and Innovative courses like Fellowship, Diploma and Certificate Courses in Medical and Allied Health Sciences.

Research has received major thrust after being conferred with the Deemed to be University status. This has resulted in enhanced MoUs and Collaborations with reputed Universities and research institutes. Good number of research projects addressing social health care problems have been taken up and are yielding information which will be of direct benefit to the people of the region. The University Journal with international academics on Editorial Board is being published by Wolters-Kluwer. (BJHS).

With the generous support from the Sponsoring Society, University has expanded infrastructural facilities- The thrid floor added to the existing hospital building, newer facilities created like Modular operation theatres, ICCU, CCU, NICU, DSA, etc. Also, departmental buildings of Biochemistry, Anatomy and Micribiology have expanded, and facilities upgraded.

The University has been concentrating on enhancing ICT facilities, strengthening and upgrading training (Skills Lab.), research facilities (Central Research Lab, Vascular Lab, Molecular Biology Lab, Genetics Lab and Cadaver Lab). Digital Integrated Campus Networking on Optical Fibre.

This year, a Swimming Pool has added to the existing sports facilities and Indoor Sports facilities are coming up.

BLDE (Deemed to be University) has a deep concern for health care facilities provided to socially disadvantaged sections of the society both in rural and urban areas. It is worth mentioning that University has established a very well equipped Rural Health Centre in the nearby village, Ukkali. The Institute has gone through the first cycle of assessment by NAAC and accredited with CGPA of 2.90.

- Administration student-centric and pro-active.
- Management Progressive.
- (Allied Courses) M.Sc., B.Sc. MIT

The Medical College and Hospital are situated adjacent to each other on a campus sprawling over 45 acres of land, in the heart of the city. The campus has beautiful landscaped gardens and black stone buildings of old-world charm, which are well ventilated and illuminated. The college departments, the Central Library and residential areas are distributed in various blocks within the campus.

The college has 23 departments with state of the art facilities for imparting teaching both undergraduate and postgraduate students. In addition, the college has separate departments of Yoga Science, Kannada and Culture which is one of the first in the state. Recently, the departments of Anatomy, Microbiology and Biochemistry expanded to provide more space and Genetics Lab has been established in Dept. of Anatomy.

Teaching Faculty…

The eminence of the staff has left its mark on both undergraduate and postgraduate teaching and has fetched name and fame. The faculty members have held high academic positions like Member of Medical Council of India, Director, Curriculum Development Cell, Rajiv Gandhi University of Health Sciences, Bangalore, Members of Board of Studies of various Universities of Health Sciences, Bangalore. In addition to holding high positions in professional bodies of their respective specialties as Chairman, Secretaries and Presidents of State Association, Secretary or as Executive Committee Members. Many have been invited to be speakers at the National and State Level events. Few of the faculties are on the editorial board and peer reviewers for International Journals and Indexed Journals like a BMJ group of Journals and publications. Two of the faculty members are visiting professors to the Universities of USA and UK.

The academic performance of the students is excellent. The examination results range from 65-85% and many students were securing first class and distinction. Twelve students have been awarded Nineteen gold medals for their excellence. Extracurricular activities are encouraged and the students from the institute regularly take part in the Zonal, Inter-zonal, University, Inter-University Meets. We share a significant number of prizes awarded every year at such events.

The Medical College Hospital

The hospital building is very spacious with adequate natural illumination and ventilation. It has eco-friendly effluent water treatment plant and incinerator for waste management. The entire campus is served by a generator for round the clock electricity supply during power failure.

The Medical College Hospital has 1125 Beds, provides Out-Patient, In-Patient, Casualty and Emergency Medicine Department Services. It has Intensive Coronary Care Unit, Critical Care Unit, Pediatric Intensive Care Unit, Neonatal Care Unit, Surgical Intensive Care Unit and Specialized Isolated Sterile, Burns Ward all equipped with required Monitors, Pulse Oxymeters, Defibrillators, Ventilators, Infusion Pumps and various other specialized equipment required for critical patient care. The hospital is equipped with an Advanced 1.5 Tesla MR1 Scan, 32 Slice CT Scan along with this all necessary Radiological Instruments like C-arm, X-ray Machine, Multiple Portable X-ray machines, 3D Colour Doppler etc. In addition, the hospital has provided Ultra Sound equipment in the Labour Room and Portable Colour Doppler in the ICU and ICCU. The hospital has fully developed Urology Unit with all Endo Urological Equipment and Extra Corporeal Shock Wave Lithotripsy equipment. The department of Nephrology is equipped with Haemo Dialysis Units and Continuous Ambulatory Peritoneal Dialysis facilities. The department of Medicine has a Medical Gastroenterology Unit with availability of all necessary Video Endoscopes for Diagnostic and Therapeutic Procedures along with a surgical gastroenterologist to intervene the necessary cases as and when required. For all surgical specialties, Laparoscopic Instruments are available to cater for General Surgery, Obst/Gynaec and Urology departments. The department of Ophthalmology is equipped with YAG Lasers, Diode laser, Fundus Camera and Computerized Perimetry, Retina surgery, Vitrectomy, SFIOL & OCT. The department of Dermatology has the facility of PUVA & Xlase LLT Yag Laser (Cosmetic Laser Therapy).

The hospital has a Blood Bank with whole blood and blood component facilities (platelets/packed cells/plasma).

Fully functional Eye Bank, registered under the Transplantation of Human Organ Act, 1994, by Government of Karnataka. These services are available 24x7 on all 365 days. Well-equipped Artificial Limb Centre and Physiotherapy unit caters the health care services.

The Central Laboratory functions 24 hours a day. The Biochemistry Laboratory is annually assessed by the External Quality Control Programme of Christian Medical College, Vellore, which evaluates laboratories on all India basis and our laboratory is listed amongst first 30 laboratories in India for past 10 years. Drug store functioning 24 hours 365 days a year is available in the hospital.

Poison Detection Centre has been established to facilitate the diagnosis and prognosis of poisoning cases.

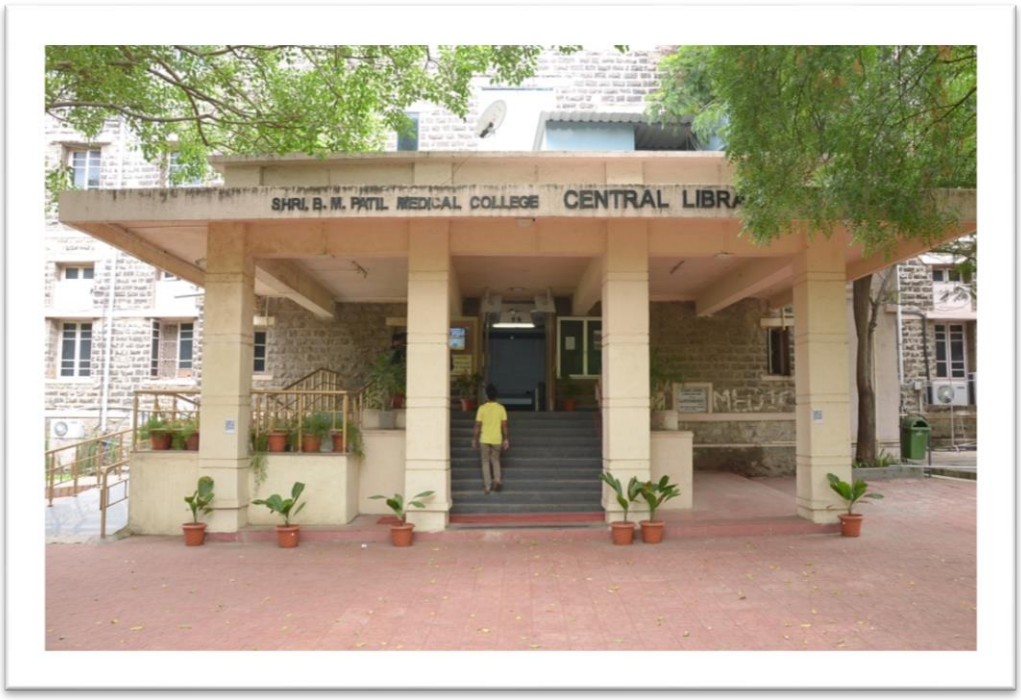
CENTRAL LIBRARY



As said by Dr S. Radhakrishnan, 2nd president of India – "Library is a heart of an institution." The primary mission of the Library is to support teaching-learning and research programs. The Department of Central Library Services of BLDE Deemed to be University was established in the year 1986's and thus serve the medical community. Serving the varied needs of our readers efficiently is the main objective of this department.

The collections support all programs taught, and the research activities carried out at BLDE DU by housing a number of collections in various formats to suit all needs. Reference materials, multimedia collections, electronic databases, journals both print and online, bound volumes of periodicals, a state of the art library Management system and professional staff have been dedicated to ensuring an efficient and supportive learning environment to all.

The Library uses the Dewey Decimal Classification (DDC) for stack arrangements. Resources could be searched using the Library Online Public Access Catalog (OPAC). The library portal includes access

to full-text electronic journals databases, a collection of e-books, Abstracts of the Thesis, the Institutional Repositories and other web-based portals and links.

The Library with built in carpet area of 2400 sq.mtr. Spread over two floors, has separate reading halls or undergraduates, postgraduates and faculty. The Central Library is completely air-conditioned. It has separate reference, textbooks and periodical section. The overall seating capacity of the Library is 750. Digital Library is having 40 computers with the internet speed of 180 Mbps and can be accessed through the campus network. The Library also enabled with Wi-Fi to facilitate the users to access the internet with their own devices.

The Library has subscribed Urkund - plagiarism checker software, for quality of writing Grammarly software using. The Library is implementing RFID solutions.
All the digital resources of the Library and OPAC is providing remote access using the Remotes software. All the users can remotely access the Library through their individual login credentials.

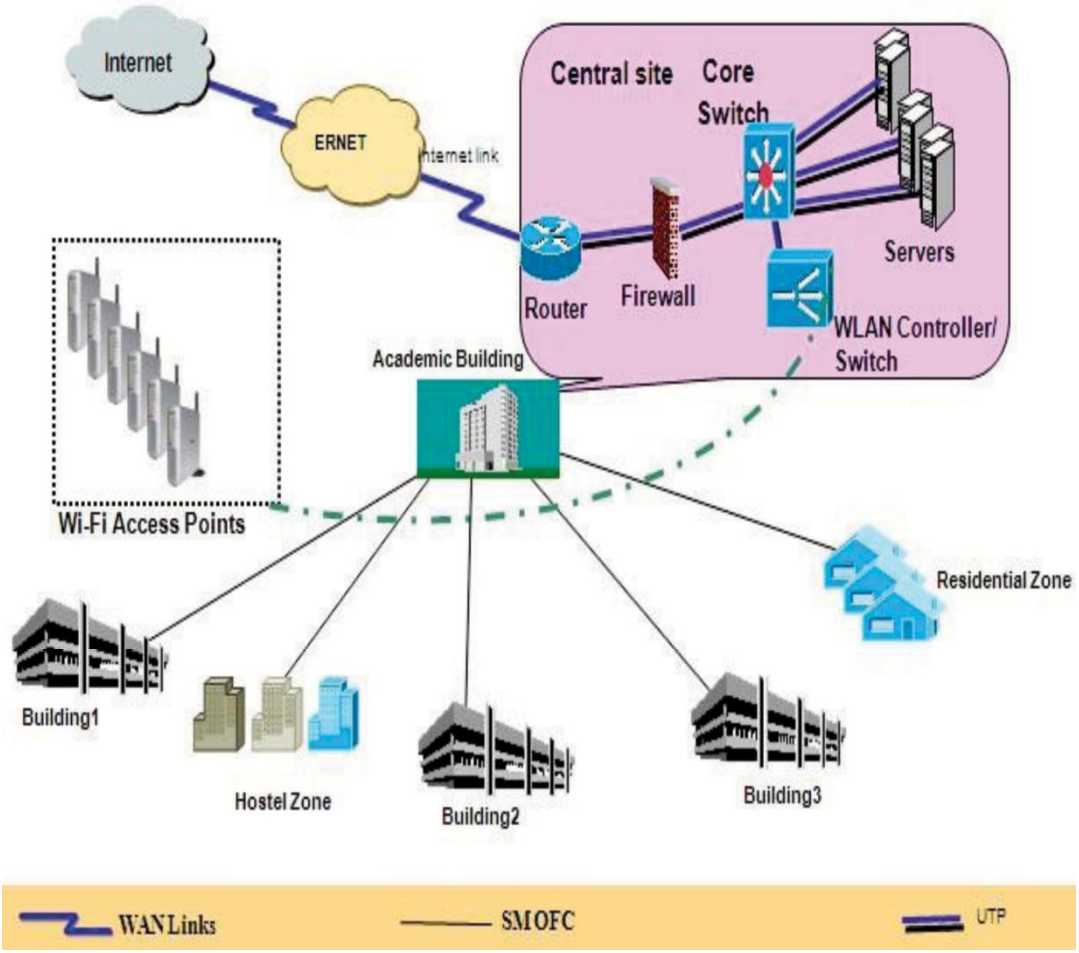
A Campus Optical Fiber (OFC) Digital Data Network is a computer network that interconnects Local Area Networks (LAN) throughout a limited geographical area, such as a University campus or corporate campus. The networking equipments (switches, routers) and transmission media (optical fiber, copper plant, Cat5 cabling, etc.) are almost entirely owned by the campus tenant / owner: an enterprise, university, government etc.

Campus Network Topology



College or university campus area networks often interconnect various buildings, including administrative buildings, academic buildings, university libraries, campus or student centers, residence halls, gymnasiums, and other outlying structures, like conference centers, technology centers, and training institutes.

Examples include Bangalore University, NITTE University, KLE University, etc. All of the nodes in a campus network are interconnected by means of optical fiber media, taking advantage of Gigabit

Ethernet or 10-Gigabit Ethernet technology. In some cases, Wi-Fi hot spots or even a hot zone make up the user end of the network, for example, in University student centers or libraries where numerous people simultaneously use portable and mobile devices such as notebook and tablet computers to conduct research and carry on communications.

Computers connected to a network are broadly categorized as servers or workstations. Servers are generally not used by humans directly but rather run continuously to provide "services" to the other computers (and their human users) on the network. Services provided can include printing and faxing, software hosting, file storage and sharing, messaging, data storage and retrieval, complete access control (security) for the network's resources, and many others.

Workstations are called such because they typically do have a human user which interacts with the network through them. Workstations were traditionally considered a desktop, consisting of a computer, keyboard, display, mouse, or a laptop, with integrated keyboard, display, and touchpad. With the advent of the tablet computer, and the touch screen devices such as i-Pad and iPhone, our definition of workstation is quickly evolving to include those devices, because of their ability to interact with the network and utilize network services.

On a single LAN, computers and servers may be connected by cables or wirelessly. Wireless access to a wired network is made possible by wireless access points (WAPs). These WAP devices provide a bridge between computers and networks.

Applications of Campus OFC Network for Teaching, Learning, and Research:

- User Access Control: Modern networks almost always have one or more servers, which allows centralized management for users and for network resources to which they have access. User credentials on a privately-owned and operated network may be as simple as a user name and password, but with ever-increasing attention to computing security issues, these servers are critical to ensuring that sensitive information is only available to authorized users.
- To access e-resources like Library e-journal subscription from all the departments and hostels.
- Video conference facility.
- Virtual Classroom for live streaming lectures within and outside campus.
- To access Health Information System (HIS) application software.
- To access Management Information System (MIS) application software.
- E-learning facility.
- Computing resources: The Institution can provide access to special-purpose computing devices that individual users would not normally own. For example, a network might have high-speed, high-quality printers strategically located around campus for the instructor or students.

Brief Summary of Campus Optical Network Project:

As planned in the first phase, we have completed the Commissioning of Campus Optical facility for Medical college campus at the cost of Rs **65** Lakh. This has enabled us to connect all academic, research, and administrative departments. We have also connected to Nursing and Pharmacy institutes for future expansion.

In the second phase, we are planning to extend Data nodes, Wi-Fi and CCTV surveillance network to Academic Departments, Gents Hostel, and other key locations of campus using this Campus Optical fiber backbone infrastructure completed in the first phase.

Future Road map:

Solution that can be integrated with the existing OFC Network in the future.

Any IP related networking devices

For example:

1) VOIP / IP Phones.

2) Video Conferencing.

3) Network storage & backup.

4) Extension of Wi-Fi & IP surveillance Service to other areas in the campus.

5) Inter-Campus Connectivity.

Note: These are only a few examples, but the possibility is endless.

Empanelment of Shri B. M. Patil Medical College, Hospital for following State Government and Central Government Health Schemes

CENTRAL GOVERNMENT ORGANIZATION

- **Bharath Sanchar Nigam Limited - (BSNL)**
  BSNL Serving and retired employees and their dependents covered.
  All treatments, medical, and surgical procedures are covered.
  CGHS rates are applicable.

- **Employees State Insurance Corporation - (ESIC)**
  ESIC serving employees and their dependents.
  All treatments, medical and surgical procedures are covered.
  CGHS rates are applicable.

- **Ex-Serviceman Contributory Health Scheme - (ECHS)**
  EX servicemen and their dependents covered.
  All treatments, medical, and surgical procedures are covered.
  CGHS rates are applicable.

STATE GOVERNMENT ORGANIZATION

- **Empanelled hospital for State Government Employees under Karnataka State Medical Attendance rules (1963).**
  State Government employees and their dependents covered.
  All treatments, medical and surgical procedures are covered.
  Our hospital rate list is applicable.

- **Karnataka State Road Transportation Corporation - (KSRTC)**
  KSRTC working employees and their dependents covered.
  All treatments, medical and surgical procedures are covered.
  Our hospital rate list is applicable.

- **Karnataka State Police Health Welfare Trust (Arogya Bhagya Yojane)**
  Police Department serving and retired Employees and their dependents covered.
  All treatments, medical and surgical procedures are covered.
  CGHS rates applicable

- **Karnataka Prison & Correctional Services Department (Arogya Bhagya Yojane)**
  Prison department working employees and their dependents covered.
  All treatments, medical and surgical procedures are covered.
  CGHS rates applicable

- **Karnataka State Fire & Emergency Services Health Welfare Trust(ABY)**
  Fire department working employees and their dependents covered.
  All treatments, medical and surgical procedures are covered.
  CGHS rates applicable

- **Karnataka State Finance Corporation**
  Finance department working employees and their dependents covered.
  All treatments, medical and surgical procedures are covered.
  CGHS rates applicable

VARIOUS CENTRAL AND STATE GOVERNMENT HEALTH SCHEMES

- **AYUSHMAN BHARAT-AROGYA KARNATAKA SCHEME (Co-Branded Scheme)**
  All BPL/APL families in Karnataka (Ayushman Bharat-Arogya Karnataka Scheme)
  Ayushman Bharat Scheme – Card for all over India
  Secondary and Tertiary care treatment Covered (Medical and Surgical)

- **Revised National Tuberculosis Programme (RNTCP) and association with DR-TB Centre**
  A. All TB patients
     Only investigation and drugs are covered.
  B. Only MDR TB patients covered (IPD Patients)
     Treatment, Care, Investigation, and Drugs covered
     The Government of Karnataka bears the cost.

- **Integrated Counseling & Testing Centre (ICTC) /**
  Prevention of Parent to Child Transmission Centre (PPTCT) and Link ART Centre
  A. All patients are covered.
     The only investigation covered.
     The Government of Karnataka bears the cost.
  B. Only People Living with HIV/AIDS (PLHIVs)
     Only ART Drugs Covered
     The Government of Karnataka bears the cost.

- **Universal Immunization Programme (UIP)**
  All children covered.
  Only immunization provided.
  The Government of Karnataka bears the cost.

- **District Disability Rehabilitation Centre (DDRC)**
  Persons with visual, hearing, speech, locomotor, and mental disabilities are covered.
  Medical, Surgical, and apparatus covered.
  The Government of Karnataka bears the cost.

- **Jyoti Sanjeevini Scheme (JSS)**
  State Government employees and their dependents covered.
  Only Surgical procedures are covered.
  The Government of Karnataka bears the cost.
  CGHS rates are applicable.

PUBLIC-PRIVATE PARTNERSHIP (PPP)

- **KLE HEALTHCARE, BELGAVI**
  KLE Health Care Scheme-Belagum (Card Holders)
  V-Care Health Scheme-Belagum (Card Holders)
  Medical and Surgical procedures are covered.

CENTRAL RESEARCH LABORATORY

The Central Research Laboratory (CRL) in the medical college is built to provide teaching staff, researchers, and graduate students with easy access to high-end research instruments. For the further development of modern medicine, it is indispensable to be fully equipped with advanced technologies such as medical, analytical, and information devices and to utilize them in a systematic manner.

The CRL is established in 2014 in Smt. Bangaramma Sajjan campus with the financial support from BLDE (Deemed to be University). The primary purpose of the CRL is to support the research activities of the faculty, Ph.D. scholars, PG students, and UG students by providing technical assistance and access to advanced and high-end scientific instruments. The secondary purpose of CRL is also to organize training programs and workshops/seminars for staff and research scholars in the focused areas of research. The CRL with 1500 Sq. Feet area provides sufficient space for multidisciplinary research. Our Hon'ble Chancellor, Dr. M. B. Patil, and Hon'ble Vice-Chancellor, Dr. M. S. Biradar are very kind enough to encourage the university's research activities.

Chief Patron: Dr.M. B. Patil, President, BLDE University, Vijayapura.

Patron: Dr. M. S. Biradar, Hon'ble Vice-Chancellor, BLDE University, Vijayapura.

Chairman: Dr. Aravind. V. Patil, Principal, BLDE (DU)'s Shri.B.M.Patil Medical College & Research Center, Vijayapura.

Members:

1. Dr. J.G.Ambekar, Registrar, BLDE (Deemed to be University)
2. Dr. Tejaswini Vallabha, Vice Principal
3. Dr. Kusal K. Das
4. Dr. Nilima Dongre
5. Dr. Uday C. Nuchhi
6. Dr. Satish G. Patil, Member Secretary

Central Research Laboratory is equipped with….

High Performance Liquid Chromatograph (JASCO, Japan)

Elisa Reader (Transasia, Erba)

UV-Visible Spectrophotometer (Elico, India)

Research Centrifuge (Remi, India)

Refrigerated Centrifuge (Remi, India)

Laboratory Incubator (i-Therm, India)

Tissue Homogenizer (Remi India)

Ultrasonic Bath (PCI Analytics, India)

Electronic Balance (Trident, India)

Electrical Water Bath (Apollo, India)

CLINICAL SKILLS LABORATORY

The surgical specialty has progressed in leaps and bounds in the last three decades. With the advent of highly technical investigative and therapeutic tools, surgical procedures have become highly specific, precise with reduced morbidity. The modern doctor provides effective care only by using these tools. Effective training is required before a doctor can use these tools. Among the three major domains of

learning for a doctor, viz. Knowledge, Skills and ethics, knowledge and ethics are learnt relatively easily by various teaching/learning methods with existing facilities. Learning skills, however, is a major challenge. It is a challenge because

- Opportunities for learning are limited
- Safety of patients during training is a concern
- Patient expectations are high, with a reluctance to let trainees do procedures.
- Honing the skills on patients directly is a problem

Hence, it is important to impart basic skills in the laboratory/ Training Centre environment and then allow the reasonably trained student to hone his skills further on a patient. Basic Surgical Skills Centre (BSSC) would meet this requirement.

This need has been realized for many years in western countries. Many countries mandate a formal certificate in Basic Surgical Skills before allowing students to take postgraduate examinations.

Beneficiaries:

1. MBBS Students
2. MD/MS Students
3. Nursing Students (Diploma, B.Sc., and M.Sc.)
4. OT Technologists
5. Paramedical workers
6. Drivers etc

[Any individual involved in patient care in most of the surgical/critical care will be benefitted.]

Postgraduates need advanced training in surgical skills, including Laparoscopic surgical skills; Postgraduates from various surgical disciplines would need a common set of surgical skills like dissection techniques, suturing, knot tying, laparoscopic skills, wound management skills, etc.

This term postgraduate would also encompass many 'medical' specialties undertaking invasive procedures like insertion of chest drains, pacemakers, liver biopsies etc.

This centre functions as nodal centre for training not only our University students but is also planning to include students of other institutes as well in this academic year.

With these priorities in mind, this centre was planned and established.

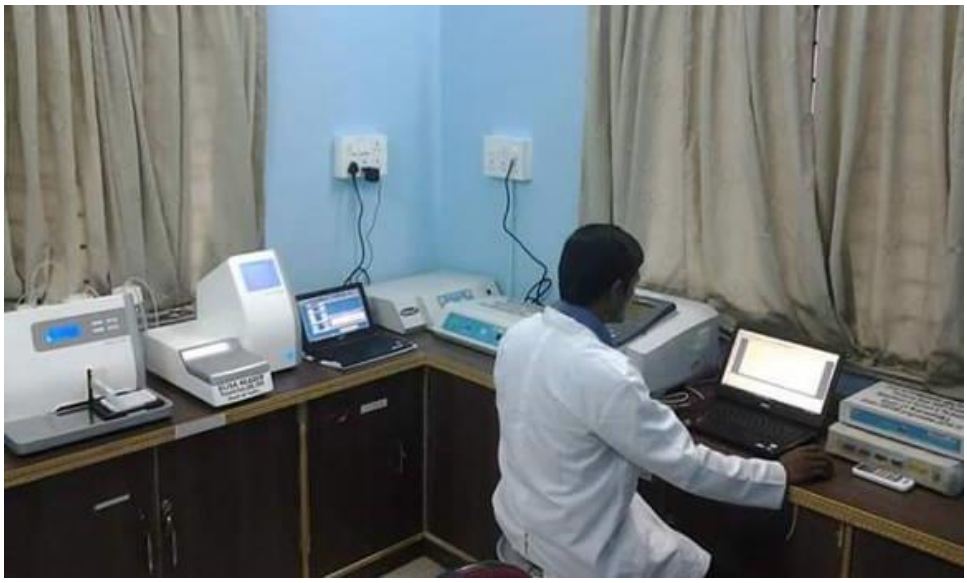
LABORATORY OF VASCULAR PHYSIOLOGY AND MEDICINE



Research Focus:

Department of Physiology has established "*Laboratory of Vascular Physiology & Medicine*" under Professor Kusal K Das's supervision. This laboratory is working extensively on both human and animal models to explore and understand the physiological basis of clinical acumen to vascular integrity. It has a specialized "ELECTROPHYSIOLOGY UNIT" and 'MOLECULAR BIOLOGY UNIT'. The Vascular Physiology Lab's focus is studying vascular function/dysfunction in healthy and diseased states, with particular emphasis on chronic cardiovascular diseases, diabetes mellitus. Additionally, vascular responses to exercise and diet are studied. A variety of techniques are utilized to examine the macro and microvascular function and arterial stiffness in humans and animal models. The laboratory also devout itself to carry out different research projects on environmental health, cardiovascular health, respiratory health, to functional modulation in different exercise-induced interventional models with their molecular signaling pathways for both humans and animals. The laboratory has a 'Molecular Biology' and 'Electro-Physiology' unit beside the clinical physiology unit. The laboratory takes care of critical experimental protocol on rats and mice where various cardiovascular, respiratory, and neurological parameters can be analyzed by both non invasive and invasive conditions. The laboratory is also capable of evaluating various cardiovascular histopathology with the help of specialized software.

The overall mission of the Vascular Physiology & Medicine Lab in the Department of Physiology is to determine the mechanisms that contribute to the development of vascular dysfunction with aging, metabolic syndrome, diabetes, hypertension etc. This lab uses integrative experimental approaches to assess vascular function of peripheral arteries, stiffness, and hemodynamics of humans' arteries.

The Laboratory also has a full-time Junior Research Scientist besides other experts like Dr.R.V.Kulkarni, Ph.D. (Pharmacy), and Dr.Prashant Metri, Ph.D. (Chemistry) as adjunct scientists.

Objectives:

The vascular laboratory's main objective is to translate basic science findings through experimental models to clinically relevant therapeutics for patients. The testing of the efficacy of various pharmacological substances, including indigenous plants derived biomolecules, on vascular efficacies are another objective of the vascular laboratory.

Funding:
Currently, the laboratory has two extramural projects (DRDO, LSRB, Govt. of India & VGST, Govt. of Karnataka) in its credit.

Core Facilities

RESEARCH (ELECTROPHYSIOLOGY)

1. MP45 Biopac Student Lab:

- Rat & Human ECG Monitoring
- Pneumogram
- HRV Analysis
- Animal (Rat/mice) invasive Blood Pressure Monitoring
- Animal (Rat/mice) non-invasive Blood Pressure Monitoring
- EEG and other neurological works
- EMG, etc. on both rats & human

2. Periscope:

- It is an automated cardiovascular analyzer. It analyzes arterial stiffness, estimates simultaneous four limb blood pressure, Central aortic blood pressure, and cardiac indices from pressure analysis.

Biochemistry:

UV Visible Spectrophotometer (Schimadzu UV 1800):

- Qualitative & Quantitative analysis of Biologically important compounds
- Enzyme kinetics
- To Study the absorption Spectra of compounds
- Quantitative analysis of pharmaceutical substances

Research (Molecular Biology)

1. ELISA Micro-plate Reader:

- Qualitative & Quantitative analysis of the Biologically important compounds (Hormones, Growth factors, Specific Bacterial or Viral Antigens) based on their Immune property. (eg: VEGF, HIF 1 alpha, etc)

2. ELISA Micro-plate Washer

- It is used in the process of washing the microplates to remove the excess/unbound antigens/ antibodies with a specific Buffer where we can set the number of washing cycles

3. Western Blotting Apparatus

- To evaluate gene expressions in blood & tissues

4. PCR (Thermocycler) machine

- To evaluate DNA sequencing and finding the specific gene

5. Refrigerated Centrifuge (-20 Degree Celsius with 20K rpm)

6. Deep Freezer (-20 Degree Celsius)

Research (Clinical)

1. Physio-Pac:

- PC based Electrophysiology system ECG, EEG, EMG, Respiratory rate, Pulse rate

2. DicroWin (PC based PPG Analyzer)

- PC based automatic pulse plethysmography analyzer system, Stiffness index, Reflection index, and cardiovascular indices such as ejection slope, Left ventricular ejection time, upstroke time, pre-ejection period.

3. CANWin (Cardiac Autonomic Neuropathy Analyzer)

- PC based automatic cardiac neuropathy analyzer and parasympathetic battery of tests

GENETICS LABORATORY

Genetics Laboratory

Cell Culture Preparation Room

North Karnataka has a unique culture, customs, and socio-demography. Consanguineous marriage is a traditional practice in many communities around the world. Consanguineous marriage continues to be common due to tradition & socioeconomic factors. In addition, we come across many disorders related to genetic counseling necessary to improve health care. As a Health Science University, genetic analysis, detection of genetic abnormalities, and research into untouched domains is an equally important function. With these issues as an area of focus, we established the Genetics Laboratory in the Department of Anatomy in October 2015 with the primary objective of Chromosome analysis & Genetic Counseling.

Our Institution has the MoU with KIDNAR, Dharwad for collaborative research in the field of 'Human Genetics and Molecular Medicine.

This is the first kind of Genetics Lab in this part of Karnataka.

Goal

To be a centre of excellence in human genetics, which conducts research, trains researchers, provides advanced diagnostic & counseling services to the needy.

Objectives

- To understand the basic research in human genetics, molecular genetic basis of chromosomal, neurological, psychiatric & other rare genetic disorders.
- To explore the molecular biological basis of growth factors.
- To train students, staff, and researchers in molecular genetic research methodologies.
- To provide advanced diagnostic service and genetic counseling to the patients and their families.

Vision & Mission

To gain excellence in the areas of Cell culture, Molecular Genetics, and Molecular Diagnosis. Perform advanced research in Genetic aspects of disorders. Impart training on genetic research methodologies and molecular genetic platforms. Provide Genetic diagnostic testing and genetic counseling.

Research Work at Genetics Laboratory

Chromosome analysis is also called karyotyping, and it is a technique that allows geneticists to visualize chromosomes under a microscope. The chromosomes can be seen using proper extraction and staining techniques when the chromosomes are in the metaphase portion of the cell cycle. Detecting chromosomal abnormalities is important for prenatal diagnosis, detection of carrier status for certain genetic diseases or traits, and general diagnostic purposes.

Purpose of Karyotyping:

Karyotyping is performed to review the genetic sequencing of a person to make sure that the person does not have a defective genetic material, which could lead to serious deformities or mutations that would affect the development of a person or otherwise affect the person negatively throughout their lives.

Laminar Airflow and CO_2 Incubator

Objectives:

- To demonstrate a micro technique for reliable chromosomal analysis of leucocytes obtained from peripheral blood.
- To prepare a karyotype from the chromosomes of human male or female
- To use the Karyotyping techniques for diagnosing a chromosomal disorder
- A karyotype can be used to visualize abnormalities in the chromosomes, such as an incorrect number of chromosomes, deletions, insertions, or translocations of DNA

Laboratory Equipments:

- Laminar Air Flow
- Co2 Incubator
- Olympus miscoscope with GenASIs Software
- Refrigerator
- Remi Centrifuge
- Water Bath
- Digital Weighing Balance
- Slide Chamber
- Hot Plate

Chromosomal analysis can be carried out for the following disorders

- Down's Syndrome with trisomy 21 (47, XY, +21)
- Patau Syndrome with Trisomy 13, XX
- Edwards Syndrome with trisomy 18 (47, XY, +18)
- Klinefelter's syndrome with a 47, XXY

Chromosomes Analysis with the help of Olympus microscope with Genesis Software

Genetic Counseling

Genetic Counseling is a type of Counseling where it requires the information of genetic disorder regarding etiology, its presentation, treatment options, prognosis, mechanism of inheritance, preventation, and recurrence risk for future problems, wherever possible.

Purpose of Genetic Counseling

- Consanguinity
- Multifactorial Disorders
- Abnormal Chromosomal Reports
- Family / Genetic Disorders
- History of Multiple Congenital Anomalies

- Genetic Disorders
- Pre-conceptional Counseling
- Premarital Counseling

Future plan of Genetics Laboratory

Apart from karyotyping, other Molecular work will be carried out in the future in the Genetics Laboratory, and these molecular works will be related to different genetic disorders like

- Breast Cancer
- Leukemia
- Diabetes
- Parkinson's disease & other neurological disorders
- Thalassemia & Rare Genetic Disorders like Haemidystonia, SRD Syndrome

Digital subtraction angiography (DSA) is a new radiographic technology used in diagnosing vascular disease.

Computer-assisted radiographic angiography that permits visualization of vascular structures without superimposed bone and soft tissue densities; subtraction of images made before and after contrast, injection removes structures not enhanced by the contrast medium. Other image processing can be performed. Contrast material may be injected intravenously or in a lower than usual amount intra arterially. It is a fluoroscopy technique used to clearly visualize blood vessels in a bony or dense soft tissue environment. Images are produced using contrast medium by subtracting a 'pre-contrast image' or the mask from later images. Hence the term 'digital subtraction angiography'.

In traditional angiography, images are acquired by exposing an area of interest with x-rays while injecting a contrast medium into the blood vessels. The image obtained include all overlying structures besides the blood vessels in the area. This is useful for determining anatomical position and variations but unhelpful for visualizing blood vessels accurately

To remove these distracting structures to see the vessels better, first, a mask image is acquired. The mask image is simply an image of the same area before the contrast is administered. The radiological equipment will then keep producing images of the same area, taking all subsequent images away from the original 'mask' image.

DSA is primarily used to image blood vessels. It is useful in the diagnosis and treatment of:

Arterial and venous occlusions, including carotid artery stenosis, pulmonary embolisms and acute limb ischemia.

Arterial stenosis, which is particularly useful for potential renal donors in detecting renal artery stenosis. DSA is the gold standard investigation for renal artery stenosis.

Cerebral aneurysms and arteriovenous malformations (AVM).

The more common use of DSA

Angioplasty - This is a treatment to open narrowings or blockages of arteries using a small balloon. It would normally be used in the legs or heart but can be used in any artery of the body.
Arterial Stent - This is a treatment to open blockages of arteries using an expanding metal mesh that remains in place to hold the artery open. This is used in the heart, pelvis, and abdomen.
Biliary Procedures - This is the treatment to relieve a blockage of the bile duct draining the liver And allow it to drain properly
Coronary Angiogram - This is an x-ray of the arteries that supply blood to the heart.
Femoral Angiogram - This is an x-ray of the arteries which supply blood to the legs
Nephrostomy - This is a treatment to relieve pain from a blocked kidney. A tube is inserted into the kidney to

Future of DSA

DSA is being used less and less routinely in imaging departments. It is being replaced by computed tomography angiography (CTA), which can produce 3D images through a less invasive and stressful test for the patient. However, most CTA cannot define or distinguish minor stenosis and ulceration from normal vessels and have difficulty in assessing remote areas of the circulation

Hence DSA is still considered the gold standard for arterial imaging. And as far as interventional radiology is concerned DSA forms the main pillar.

CONVOCATION ADDRESS BY THE CHIEF GUEST

Dr. V. M. Katoch, NASI-ICMR Chair of Public Health Research, Rajasthan University of Health Sciences (RUHS), Jaipur & President, JIPMER, Pondicherry and Former Secretary, Department of Health Research, Govt. Of India and Director General, Indian Council of Medical Research (ICMR), in his Convocation address, opined that the contribution of Indians in medicine and surgery is immense. Charaka and Sushruta were legends of Indian medicine thousands of years ago with a unique contribution to the field of Medicine. He suggested that traditional medicine should not be neglected in the pursuit of modern medicine. Regarding the present scenario he suggested that Doctors should not depend too much on technology for providing health services, nor should they stay away from technology. Technology should be used to help us as needed.

He added that "The economic condition of the patients should not be the criteria for providing medical service and there is no difference between physicians and butchers if the treatment is given based on patient's economic condition." His advice regarding the humanitarian approach towards patient care was acknowledged immensely.

Geriatric Clinic
BLDE University
Vijayapura

1 December 2019

Dear Dr. Ambali

It gives me a great pleasure to congratulate BLDE University for taking an initiative to start Geriatric Clinic under your able guidance & supervision.

The number of elderly patients being treated at both indoor & outdoor are getting the quality care under the supervision of a qualified geriatrician & his dedicated team.

The papers presented in various conferences by your PG students are being admired.

The two conferences which you organized jointly with Geriatric Society of India was an academic feast in the field of Geriatrics.

Your research papers in international conferences speak volumes of the work that you & your department is doing.

The social work by your geriatric clinic in the field of vaccination, public lectures & celebrations of elder's day, Alzheimer's Day & Elder's Abuse Day is being widely appreciated by various sections of society.

I see for you & your team a great future in this field & assure all possible cooperation.

Please do convey the good wishes of our patrons Dr. P. S. Shankar & Dr. V. K. Arora, our President Dr. Agam Vora and President Elect – Dr. Prabha Adhikari to other members of your team & the members of administration including your respected principal & vice chancellor.

With Kind regards

Yours sincerely

Working together to prevent suicide

S P CHAUKIMATH & SHAILAJA PATIL

Suicides are preventable, yet over 8,00,000 people end their lives worldwide every year, one every minute. For every self-ended life, there are 25 others who had attempted. Recently two suicides—that of a US financier in New York prison and a businessman in Karnataka—hit the headlines bringing the issue to the fore again.

'Working together to prevent suicide' was the theme of the 2019 World Suicide Prevention Day (September 10). It was the same last year, and will be the same for 2020 too.

Joining together is critical to preventing suicide. Every individual, institution and organisation has a role to play. Suicide is a complex problem with several interrelated contributing factors like genetic, psychological and social etc. It claims more victims than murder, violence and war put together every year.

Nearly 80% of global suicides occur in low and middle-income countries which have limited resources and manpower to tackle it. The situation is grim in India; World Health Organization (WHO) data shows that India contributes almost 17% of the total suicides worldwide. There is a gross under-reporting too.

In many countries and societies, suicide and attempted suicide are stigmatised and condemned which hinders help-seeking and provision of services to the needy. It's a criminal offence in some countries, though India has decriminalised it. Awareness about the causes of suicide, warning signs and caring for those in distress can help prevent suicides.

A comprehensive National Suicide Prevention Strategy is needed to promote, coordinate and enlist the support of various sections of the society. Suicide prevention requires integrative strategies that encompass work at the individual, systems and community stages to provide necessary interventions.

At national level policy changes, public health strategies, incorporating measure with strong evidence of efficacy, such as restriction of access to lethal means can be planned. It is estimated that around 20% of global suicides are due to pesticide self-poisoning. Regulating formulations and sale of pesticides is necessary.

Similar restrictions are needed for over-the-counter medications. Guidelines must be formulated for the mass media for reporting suicide. Suicide portrayal in the film and entertainment is an important area of concern.

Redesigning medical curriculum by expanding psychiatric training for medical students goes a long way in preparing them to tackle the emergency situation.

Community-level and NGO interventions like increasing public awareness about common warning signals and enlisting sources for help to people in distress can help people in need. At many places, crisis intervention services, counselling centres and telephone hotlines are established but the gulf between what is being done and what needs to be done is huge.

Everyone can join hands in preventing suicidal behaviour, by lending a patient ear and reaching out to someone in the community. Sensitising and training some special group of people (training gatekeepers) like teachers, primary care physicians, the staff of correctional facilities, traditional healers, priests, etc. will help in prevention.

There is no simple solution to reduce suicide rates. It takes multiple approaches to implement and produce the desired results. The task is a universal challenge.

INTERNATIONAL HYPOXIA SYMPOSIUM

(Celebration of Nobel Prize for Physiology/Medicine 2019 to Hypoxia Biologists)

The Laboratory of Vascular Physiology and Medicine, Department of Physiology organized International Hypoxia Symposium-2019 on the theme "Oxygen Cell Signalling: Mechanisms to Therapeutics" on November 23, 2019. Dr. M. S. Biradar, Hon'ble Vice-Chancellor, inaugurated the Symposia by watering the plant along with Prof. Thuppil Venkatesh, President, International Society of Chronic Hypoxia. Dr. Bhaskar Saha, Scientist-G, National Centre for Cell Science, Pune, Prof. Gustavo Zubieta-Calleja, High Altitude Pulmonary & Pathology Institute, La Paz, Bolivia, and Prof. Jan Marino (Nino) Ramirez, University of Washington, USA. Dr. Aravind Patil, Dean, Faculty of Medicine & Principal, presided over the function. Dr. J. G. Ambekar, Registrar, Dr. Vijaykumar Kalyanappagol, Medical Superintendent, Prof. Kusal K. Das, Professor of Physiology, Dr. Sumangala Patil, Professor & HoD of Physiology, and Faculty Members were present.

Topics:

- Adaptation to high altitude: the paradox of tolerance to hypoxia; one small step but a giant leap to BioSpace Forming - Prof. Gustavo Zubieta-Calleja
- Oxygen sensing in the central respiratory network and the implications for disordered breathing and cardiorespiratory control - Prof. Jan Marino (Nino) Ramirez
- Oxygen sensing mechanism in ageing in relation to arterial stiffness - Dr. Jyoti Khodnapur.
- Polyerythrocythemia and cerebro-vascular accidents at high altitude- Dr. Natalia Zubieta DeUrioste.
- Low oxygen microenvironment in cardiovascular remodelling: Role of L/N type Ca^{2+} channel blocker-Dr. Shrilaxmi Bagali
