INDEPENDENCE DAY CELEBRATION - 2019

Date: 15.08.2019

BLDE (Deemed to be University) held its head high on the auspicious occasion of the 73rd Independence Day. The day was indeed a trigger of patriotism and pride dedicated to our beloved country as celebrated in the university auditorium.

The celebration began with a huge gathering of teaching and non-teaching staff; doctors and HODs of various departments of the college and hospital; and the students of the medical college in front of the university office at 7:30 A.M. with the honourable Vice-Chancellor of the BLDE (Deemed to be University) as the chief guest and the enthusiastic and energetic principal of the medical college was present in the gathering. 2nd phase MBBS students coordinated the event.

A parade was also present to mark the event as a more patriotic one rather than being just formal. At around 8:00 A.M., the national flag was hoisted by the chief guest with the national anthem followed by a choir of the college.

Thereafter, everyone headed towards the college auditorium for further celebration. This was followed by an inspirational speech by the chief guest, honourable Vice-Chancellor. Following this, the students expressed their view and spoke on the idea of independence and the struggle our countrymen went through to achieve it. The students also stressed on the fact that despite being independent, how bound we are to the generalised problems like poverty, unemployment, corruption to name a few. An eye-opener, this speech was full of a reality check.

Classic patriotic songs and patriotic dance by the students filled the air with patriotism. The celebrations ended with the national anthem by the audience.

UNNAT BHARAT ABHIYAN- PARTNERING TO BUILD AN INCREDIBLE INDIA

70% of the population in India lives in rural areas engaged in agrarian economy with agriculture and allied sector, employing 51% of the total work-force but accounting for only 17% of the country's GDP. There are huge developmental disconnects between the rural and urban sectors such as inequity in health, education, incomes and basic amenities as well as employment opportunities - all causing great discontent and large-scale migration to urban areas. The overall growth and progress of the country mandates the development of rural areas in tune with Gandhian vision of self-sufficient 'Village Republics'. Being a higher education institution we are committed to provide quality health education and health care to its stakeholders but also deem it a social responsibility to cater to the health needs of the rural population and make a significant contribution towards the overall development of rural sector. Also to build a future physician workforce with ample experience and understanding of the rural population and a commitment to serve them, early exposure to the rural India in their formative years is crucial. In this context the University considers its participation in the UBA an opportunity to make a positive and effective contribution to the country's progress.

Unnat Bharat Abhiyan has been adopted by our university with the mission to work with the people of rural India in identifying developmental challenges and evolving appropriate solution for poverty, illiteracy and ill health.

BLDE (Deemed to be University) was one among the few health education institutes to register early to participate in 'Unnat Bharat Abhiyan' a national program launched by the Ministry of Human Resource Development. The University got selected by **MHRD, Government of India** as a Participating Institute (AISHE code U0214) under the Unnat Bharat Abhiyan in the month of **April 2018**. Dr. Praveen Ganganahalli, Nodal Officer UBA attended orientation program for UBA at AICTE New Delhi **on 25th April 2018**. The University got permission from Deputy Commissioner of Vijayapura district to enroll five villages under UBA on **12th June 2018**.

For many decades, the focus in India was on communicable diseases. Targeted efforts have led to a significant reduction in morbidity and mortality from communicable diseases. Unfortunately, the burden of non communicable diseases (NCD) is rising at a rapid rate particularly in rural India. Hence our University has focused on awareness, education, prevention, screening and management of Non communicable disease. Since July 2018, village survey and household survey done by using the standard proforma given by UBA by team headed by Dr. Praveen G in all five selected villages of UBA. 4-5 interns on rotation basis are posted for survey to build a future physician workforce with ample experience and understanding of the rural population and a commitment to serve them.

Major problems with their solutions have been identified and road map has been prepared to work in the Human Development domain, which includes the components like Health, Education & Holistic perception.
