Editor's Note....

Dear Readers,

This trimester has started with unprecedented spread of Covid 19 pandemic causing major setback to mankind in all frontiers of life. The direct experience of pandemic has brought fear, confusion and totally new challenges. At the same time, being health care related University, it has given us opportunity to serve, support & mitigate problems of our local population. The team of health care workers have stood up as frontline warriors. Let us pray Almighty to give courage knowledge, compassion to all of us in tiding over this crisis. Let us pray for health of our frontline workers who are risking their lives for our care.

Regards,

Dr. Tejaswini Vallabha**Chief Editor**

Students Writes...

Grow through what you go through

-Tyrese Gibson

For someone who's as unsettled as me; it has always been tough taking decisions. And the hardest decisive time was post my pre-university exams. Opting for medicine wasn't about the continuing legacy of the family, rather it was about taking up the adventure of knowing the greatest machine-'THE HUMAN BODY'

Recalling my literature interest, my first poem in English was on 'brain'. It always fascinated me. So here am I, stepping into medical course at BLDE medical college, Vijayapura. I was delighted to continue my education in North Karnataka. Little did I know, this college would be a great platform!

In the beginning of the term, we had to attend the 'foundation course', which was scheduled for the freshers to fit in with the college. Soon, during this period, I was introduced to various co-curriculars organized here. And I was elated knowing, I belong to the institution, where personalities are molded. I partook in few speech and essay writing competitions. Aptly, the staff here is very driving and they acknowledge talents and efforts put in by the students. For my write up, I bagged second place and was awarded a book during my 'white coat' ceremony! This was my first win here, it will always remain special as my parents were present. I do remember my unfamiliar senior, congratulating me! I felt opportune.

Academics began and I was hustling to keep up in non-scholastic stuff. I am constantly exposed to the sheer talent and it's mesmerizing. My batchmates, seniors and teaching staff; are proficient.

During my first cultural fest, B-Beats, I co-anchored an event along with my senior and also performed stand-up comedy!!! It is quite funny that it wasn't funny! Nevertheless, aren't tiny steps, the beginnings that matter? The whole vibes of the fest were adrenaline-rushing. The college, especially IT department is so enthusiastic.

We are also supported in multiple events-AMSA, AIIMS annual fest, the first start up in medical colleges was held at ours. Throughout the year, innovative competitions such as crossword solving, picture composition, academic symposiums are conducted. Our principal is the most passionate and visionary. Hospital visits are the most satisfying and heartening.

Currently, following the internals, I am looking forward to improve myself and explore my talent.

As an aspiring doctor, I want to put in extra efforts to shape myself.

I am grateful for being in the right place at the right time.
