THE FOUNDERS & VISIONARIES

H.H. Shri. Banthanal Swamiji

Dr. Fa.Gu. Halakatti

Shri. B. M. Patil

FOUNDER OF THE UNIVERSITY

Dr. M. B. Patil B.E. President

BIJAPUR LIBERAL DISTRICT EDUCATIONAL ASSOCIATION

Located in the northern part of Karnataka, Vijayapur city has rich historical background originating in Chalukyas of Kalyan (10-11 century AD). Later, architectural and cultural developments took place under the ruler Allauddin Khilji and Adil Shahi dynasty. Other places of historical significance around Vijayapur include, to name a few, Badami, Aihole, Pattadkall and Kudalasangama.

The Vijayapur Liberal District Education Association was established in 1910. Founded by philonthropists and visionaries par excellence, the Association has emerged as one of the foremost charitable associations in Karnataka. Dr. Fa. Gu. Halakatti, one of the founders, was called as 'E' Uddharak of Vijayapur district. An advocate by profession, he was also a great scholar. His work on Vachana Sahitya has earned him the title of Vachana Pitamaha. He was an institution by himself.

BLDE Association had the blessings of His Holiness Shri Banthanal Swamiji whose dictum was: "Students are my only God and institutions are my Temples." Like Pandit Madan Mohan Malaviya, Swamiji nurtured the BLDE Association and helped establish educational institutions. During the process of growth and expansion, Shri B. M. Patil, a great visionary and a renowned statesman was the most notable custodian of the Association. He was a pioneer in establishing institutions imparting professional education. It was under his leadership the Association established Engineering, Pharmacy, Nursing and Medical Colleges. A new era began when

BLDE University

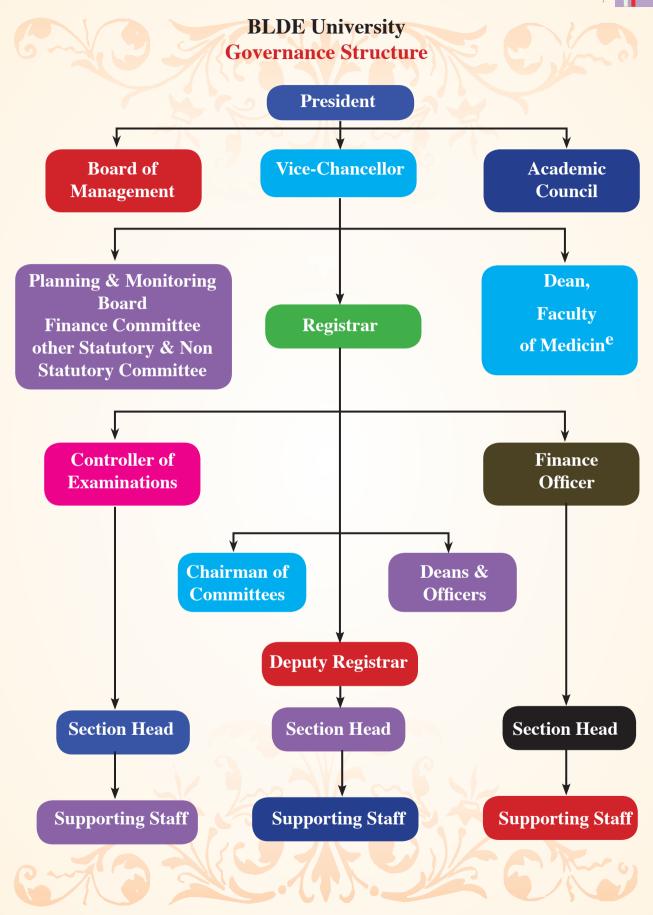

Dr. M. B. Patil, a young and dynamic leader, took the reins of the Association. Being an engineering graduate himself, he has thoroughly grasped the role of quality education at all levels in an era of liberalization and globalization. In particular, his vision has led to the establishment of the BLDE University in 2008. He is committed to provide quality medical education and cost effective best healthcare facilities to the people of the region.

Presently, the Association sponsors and runs Primary Schools, High Schools, Pre-University Colleges and Degree Colleges in the faculties of Arts, Science, Commerce, Law, Management Education Science, Fine Arts, Pharmacy, Nursing, Nursery, Sericulture, Engineering, Polytechnics, Medical Sciences with Post Graduate courses and sponsors the BLDE University. In all institutions, spread over villages, Talukas and districts are supported and managed by the BLDE Association.

After 100 years of its meaningful existence, the Association is committed to serve the cause of sustanable quality of education with dedication in this region, the state and the country in the decades to come.

LIBRARY

Central Library was established in 1986. The central library, along with departmental libraries, is supporting the teaching and learning process by providing physical and intellectual access to information. The library has a comprehensive collection of documents useful for the faculty and the student and serving as a resource center for the health science information.

The Library with built in carpet area of 2375 sq mtr spread over two floors, has separate reading halls for undergraduates and staff/postgraduates with central A/C facility. It has separate reference, text books and periodical section. Digital Library is centrally air conditioned with 40 computers and broadband connection. The overall seating capacity of library is 650.

The Library using "NewGenlib" open source integrated library management software with all the modules for the library housekeeping operations such as:

- Acquisition System
- Catalogue System
- Circulation System

- Serial Control System
- Article Indexing

Felicitation Function of Bharata Ratna Prof. CNR Rao

Bharat Ratna Prof. C.N.R. Rao visited our campus on March 3, 2015. A grand welcome and felicitation to him and Mrs.Dr.Indumati Rao was organized by BLDE University and BLDE Association. Prof.C.N.R.Rao delivered an inspiring guest lecture and enthused the student community. Around 1500 students and faculty belonging to various institutes of the Association and City participated.

CENTRAL RESEARCH LABORATORY

The Central Research Laboratory (CRL) in medical college is built to provide teaching staff, researchers and graduate students with easy access to high end research instruments. For the further development of modern medicine, it is indispensable to be fully equipped with advanced technologies such as medical, analytical and information devices, and to utilize them in a systematic manner.

The CRL is established in 2014 in Smt. Bangaramma Sajjan campus with the financial support from BLDE University. The primary purpose of the CRL is to support research activities of the faculty, Ph.D. scholars, PG students and UG students by providing technical assistance and access to advanced and high end scientific instruments. The secondary purpose of CRL is also to organize training programs and workshops/seminars for staff and research scholars in the focused areas of research. The CRL with 1500 Sq. feet area provides sufficient space for multidisciplinary research. Our Honorable President Dr. M. B. Patil and Honorable Vice Chancellor Dr. B. G. Mulimani are very kind enough to encourage the research activities in the university.

Central Research Lab Building and Inside View

Inauguration of BLDE University's Central Research Laboratory by Dr. M. B. Patil Hon'ble President on November 01, 2014. Hon'ble President being briefed about the facility at Central Research Lab. Prof.M. I. Savadatti, Prof.B.G. Mulimani, Dr. M. S. Biradar and Dr. J.G. Ambekar were also present on the occasion.

CUTTING-EDGE MEDICAL TECHNOLOGY

Computer Assisted Surgery with ENT Fusion Navigation in Department of ENT

The Department of ENT is now using a high-tech piece of the state of the art equipment called 3D Computer assisted Navigation system which enables ENT surgeons to operate with incredible precision, reduced risks and complications. This 3-D navigation system makes a big difference for the patient. It will improve overall health care in the region, thanks to this technology.

How Computer Assisted Surgery works?

During computer assisted surgery specialised software creates a virtual 3-D model of patient's head and sinuses, essentially a digital road map for the surgeon to follow.

The device is fixed with a 3-D infrared camera which senses accurate placement of instrument and help the surgeon to match the patients' anatomy in a 3-D Model displayed on a monitor much like GPS IN A AUTOMOBILE. The surgeon is able to track with real time, in relation to patients' real anatomy.

Why Computer Assisted Surgery:

Computer assisted surgery (CAS) is taking visualization and surgical accuracy to new heights in the operating room. First utilized in neurosurgical procedures, where precision is of the utmost importance and millimeters matter, CAS technologies are now being utilized in neuro, spine, ENT, Orthopaedic, and Trauma surgeries. Surgeons may choose to use CAS for many reasons. Clear visualisation of surgical site is vital aspect of any operative procedure. ENT Fusion navigation system helps ENT surgeon to navigate surgical instruments through complex anatomy of Sinus passages and avoid unintentional damage to delicate structures like eyes, skull base, brain, nerves

and vessels. The ability to work in this delicate environment helps to reduce risk of complications and leads to better patient outcomes.

Use of computer assistance is firmly established as a valuable technology in the management of paranasal sinus disease. It may improve the confidence of the surgeon by confirming the position within the challenging anatomy field. This serves to increase surgical effectiveness and decrease surgical morbidity.

CAS is most helpful in specific anatomic areas, especially in the frontal sinus, the sphenoid and the sphenoethmoid regions, the residual ethmoid partition and disease, in skull base identification, and in orbital dehiscence or orbital surgery for optic nerve or orbital decompression. Many difficult cases are there that cannot be done safely without this technology (for example, in those who have had previous surgery with distorted anatomy or those with bone erosions, and intraorbital or extradural extension. Treatment of anterior skull base tumours like pitutary adenomas, Anterior CSF leaks have become easy and are going on routinely at our Hospital.

Computer assisted surgery is cutting-edge medical technology that offers many benefits to both the surgeon and the patient.

Dr. H.T. Lathadevi,

Professor, Department Of ENT
