## BRIEF CASE REPORT:

### DIAGNOSIS AND TREATMENT IN TIME SAVED THE LIMB OF A CHILD

- Dept.of Paediatrics.

9 year old child had developed painful hip on right side. Child was treated at private hospital at Bagalkot. Investigations showed high WBC cell count, High ESR(>100mm/hr), High Platelet count (7,00,000/cumm)-All indicators of significant infection. X-Ray of hip region on careful observations showed slight destruction of hip joint bone. Mantoux test ( a simple bedside injection test for evidence of Tuberculosis) showed strong positive result. X-Ray of chest showed evidence of primary tuberculosis infection of lung.

The child was diagnosed to be having tuberculosis of hip joint, and was started on DOTs anti tubercular treatment under RNTCP. There was drastic improvement in the hip joint pain. Within one week child was able to walk without any pain or difficulty. Child was discharged with reference to RNTCP DOTS centre near his village for completion of six month antitubercular treatment regularly.

An alert, inquisitive mind, appropriate investigations, correct interpretation of the reports, and prompt appropriate treatment saved child from what generally would lead to permanent damage to hip joint, and lifelong major disability.

**Dr.R.H.Gobbur.** Professor, Department of Pediatrics.

**SCHOLAR'S WRITE-UP...**

My name is Shaik Hussain Saheb, Ph.D. Scholar in Department of Anatomy, BLDEU 'S Shri B.M. Patil Medical College & Research Centre. I like the university because BLDE University is characterized by diversity and a high degree of commitment of faculty. I chose BLDE University because of its practical relevance. Our professors at BLDE University are also our personal mentors, moulding us in every aspect into becoming excellent researchers. BLDE University provides students with endless opportunities with skills and knowledge. In our Pre- Ph.D. course work, University conducted Research methodology and Biostatistics classes which were very helpful in our research. The syllabus and course structure were nice, especially biostatistics practical classes helped me a lot and I can do now myself statistical analysis of my research work. The deep exposure of research methodology helped me to design new proposals of research. The same classes gave idea on how to write my thesis. The BLDE University administrative staffs are very friendly, informative and communicative. Guide is helpful & encouraging.
