## *Student writes...*

I am very happy to write about BLDE University. I had heard about this university and college and always wanted to work or study in this institution. My dream came true when I got seat to pursue PhD Anatomy in this university.

Department of Anatomy is very welcoming. HOD is very co-operative and all staff has been supportive. The department also provides excellent research facility, and a very well established museum.

University: When I shifted, on personal grounds the university also supported by allowing me to continue my research work at my new location. The staff members in university office have also been very co-operative.

I also remember once, when many PhD scholars came from distant locations for course work-study for two months, the university extended warm hospitality by arranging accommodation in the hostel. This I can ascertain was extremely helpful for all the participants.

Though I miss working directly in the college and university, I am grateful for allowing me to continue my research. I consider myself lucky to have got an opportunity to study in this reputed university.
