NSS ACTIVITIES

Reintroduction of Birds in Campus

Due to many natural and manmade environmental disturbances, there is a notable decline of Birds in our environment. NSS Volunteers have shared the social responsibility of protecting the Birds which naturally protect our nature. Under this activity volunteers have planned and arranged 60 points in the campus to hang water and food pots in the tree so that Birds get water, food and shelter.

Birds are the most beautiful creatures on the earth which can make our green campus more beautiful and natural chirping of Birds is enjoyable and inspirable to the nature lovers. It is a beneficial to nature, students and citizens who use our campus for morning and evening walk. They all share the social responsibility of protecting our nature

Plastic free campus

Our NSS Volunteers and programme officers with co-ordinator have undertaken task of plastic free campus

Our volunteers are involved in this activity and they approached various stores in the campus as well as canteen and requested them to use paper packets instead of plastic bags. Slowly there is attitudinal change.

STUDENT WRITES...

August 02, 2011, was the day when I entered this medical college. A bit confused, a bit nervous and with lots of questions in mind and fear of surviving 5 and half years in this place made me more nervous. But as the days passed, the mindset which I had of 'how a typical medical school is' changed. I found medical school was not as cruel as I thought and yes not as cool as is shown in the movies. 'Classes, Attendance, Internal Assessment' had become 'Roti, Kapada, Makhan,' of my life, the 3 essentials of life, Gone were the days when I rolled up myself in the quilt around 10 pm at night. I was surrounded by late night studies and sleepless nights. But slowly all these things which made me get on my nerves, started becoming part of my life and I started enjoying each day. Thanks to all the teachers who were always standing by me.

All the anxiety, confusion and the nervousness in me had vanished. Now I stand confident with clear vision. This change in me was not possible without the support of my institute, teachers, friends and seniors.

I thought my college is the best when it comes to academics and teaching, until September arrived 'the most awaited month' in my college, I can say. The college fest, cultural events, sports events, the batch wise struggle to win the competition and the spirit which would crop up in all the students is the best part and worth appreciating. Not only students but also teachers actively participate and enjoy, this is what makes my college more unique.

Immaterial of how much I got scolded in class, viva and postings, end of the day the satisfaction which I have, puts a smile on my face.

The list is endless, each moment teaching lesson of life. And of course all credits to the college not only in making me a better doctor, but also a better person each day.
