Editors Note

Happy and prosperous New Year to all the readers.

As you are aware, the News Bulletin will step in to its 3rd year of publication. Well, it is growing on the strengths of activities and achievements of the University and all its stake holders. We hope to have more and more contributions from all stake holders for it to be more interesting and readable. Please share your experiences, achievements and challenges faced in all aspects of campus life. Be it related to patient care, students, research or even your personal experiences. Again on behalf of all the team, I wish you fruitful year ahead...

STUDENT WRITES...

Life takes strange turns, especially when you are not looking. Mine was same. Whether life took me along the path or my will, I would not like to comment. But here I was in Shri B M Patil Medical College, one of the prestigious institutions of the historical city of Vijaypur. I have stayed in this city since my birth, but 'now' I see it in different way. Now there seems to be a cosmic reason for everything.

I remembered the first day I set my foot here. It was a mixture of feelings, belly full of butterflies. Anxious of future, hopeful of better days, excited about the fun we would have, scared of huge books to be digested, tensed of the kind of welcome from new environment, curious about the new friendships to be made..... The green lush campus and the vibrant atmosphere was a thrilling welcome. I merged with the buzzing crowd moving variantly throughout the campus. The sight of white aprons all round made me feel small. Like a toddler taking a first step, I stepped into the vast structure of the institution. Then came the orientation programme. It was a brief tour of the five and half years of UG journey. I entered the programme completely clueless and came out with confidence.

The classes begun. Things started at slow pace. I guessed this is how things are going to be. Then tempo increased, and then it made me realize I better be fast or I would be left behind. As our lecturers started to guide us through the course I felt I was growing in my path of becoming a doctor.

Here I would like to put in some landmarks of my journey, to date first and foremost the haemetology practical. It was painful experience 'literally', had to prick oneself to perform the practical, which increased my tolerance to pain and strengthened me. Secondly the Books. Volumes and Volumes of them, probably got dizzy at them for the first time, but now they are my constant companions. Then comes the Anatomy, dissecting the cadaver (a dead body in plane English). Initially fear was written on my forehead but when I gone through "Thus spoke the cadaver" in our B D Chaurasia Textbook, where it request us to handle it with love and care, be sympathetic to person with disease and not to be panic at any condition., also said that 'dead teach the living'. This helped to build interest and confidence towards the subject. Finally coming to the friends who share the most part of the day with me, who are companion in my wonderful journey of becoming Doctor. A hopefully a good one.

To put into a nutshell, though my journey has fast begun, I can feel the vastness in to which I am going to plunge towards the next four and half years and determine my destiny to be a DOCTOR.
