Editors Note....

Geetings from the editorial team.

This trimester was full of activities and included NAAC Peer Team visit for assessing & accreditation of the University. The support of the Management and unstinting efforts by all concerned resulted in successful visit. The University is accredited with good score of CGPA 2.9 and grade 'B' grade. This is also a reminder for all of us to march forward with a goal of obtaining 'A' in next cycle. Prof. Kusal K. Das has made us proud again. Hope he will be an inspiration to all the budding scientists.

Cath Lab services started on 6th January. Dr. Sanjeev Sajjanar, Asst. Professor of Cardiology has carried out 25 Angiographies till date and life saving emergency angioplasty. The system is functional and capable of managing, all interventions like angiography, angioplasty and pacemaker implantation. This has been a great advantage to people from this area.

Regards,

Dr. Tejaswini Vallabha

Student Writes...

The first day of my college, 4th August 2012, a day that got attached in the memories in my life forever. Being a doctor was always been my dream since childhood, and since the selection into a medical college, I was just on cloud nine.

The day one of college, where I lived my dream, with the white coat on, the feeling of becoming a doctor, everything was just so overwhelming.

The journey of my college life has been full of ups and downs. The major challenges ahead of me were routine classes, lectures, practicals, tutorials and postings. The classrooms were a new world to me where, I felt, I knew nobody and I am unique among them. The best part of my college has been dissection classes where I had the first time experience of knowing the anatomy of the human body. Freshman experience definitely makes an impression on you. The operation theatres have also always fascinated me.

The college apart from education has also given a platform for extracurricular activities through sports and cultural programmes. I also was fortunate enough to pursue a research project, which was sponsored by ICMR. It actually helped me gain insights about practicality of the research. This was possible only because of my mentors who were always there to guide and support me.

Days have passed and I have reached my final year. When I look back, I still remember those sleepless nights of exams, exhausting schedules, birthday celebrations at hostel, fights, friendships and the list goes on.

Overall, it has been a roller coaster ride. There is a saying college is about finding yourself, I have definitely found myself as it has given me the chance to sharpen my skills in my field of choice. There has always been and will always continue to be opportunities to learn more.

Waiting for the day to become Dr. Yojana Goyal !!!

Miss. Yojana Goyal
