Student Writes...

MED school, the thought had always made me have multiple emotions. The thrill of being a part of it and also fear of surviving it.

Perhaps, after joining Shri B. M. Patil Medical College, I realized that all my fears were vague. Only after being a part of this Institute, I released why it has reached such heights.

As the saying goes 'The value of the place is measured by the kind of people working there', our professors, our entire staff folks have an extraordinary depth of commitment, their passion for their work, their willingness to embrace our new ideas, their determination to overcome any obstacle hindering our progress as that of the institute is truly outstanding.

Their support and love is such a homely feeling. The infrastructural and learning facilities, we have are no less than any top colleges in India.

Not to forget, the green of campus and stone building are charming and it is such a great place to relax and study. Talking about opportunities, we have plenty in research works, projects, seminars, co-curricular like sports, literary and cultural events and the list goes on.

Today, I am extremely happy to say I am student of such marvellous institute. I feel safe in my career and future.

Tomorrow, this institute will be part of everything I shall achieve and I shall always try to make the institute proud of me.

Thank you,
