Editors Note....

Greetings from the editorial team.

The second trimester was full of academic activities with mandatory responsibilities like examinations, inspections etc. These did not dither the academic, co-curricular and others activities which went on in full swing as showcased in the bulletin. Feather to our cap was Kalpana Chawla Award to our faculty member Prof. Shailaja Patil, Professor & HoD of Community Medicine. During this trimester the University added upgraded facilities to the Hospital, Research Laboratories for high quality research and excellent health services apart from MoUs signed and visits of dignitaries.

We are here to receive your responses.

Regards,

Dr. Tejaswini Vallabha
Chief Editor

TIME-Keeping up with it!

It's been more than 5 years that I have tread the path of teaching and learning at the same time, and I have noticeably evolved from my earlier self in many aspects as the teaching profession offers a lot of resources (Training, Challenges, Experiences) to better oneself than any other career that puts bread and butter on your plate.

A teaching profession is never a cakewalk as we have to constantly push our own limits –keeping up with the changing concepts in the subjects as well as the range of students we have to cater to. We are yet to develop a research culture- a new one on that, besides these we have to keep ourselves abreast for inspections, accreditation and appraisal processes which all climaxed into a chorus- STRESS. Eventually we bought the idea with each passing event that strengthened our affirmation that stress is part of life and we have to learn to manage it. But something we have forgotten is only those assets which are dear to us, need management- like our life, family, children, studies, business and our wealth and stress is definitely not an asset. “I AM STRESSED” has hit the headlines of everyone's life and has become almost a fashionable statement and the more often you utter, the most busy a person you are taken to be....but down the lane, we better realize late than never that stress need not be inevitable. It just happens to a byproduct when we do not manage the commodity called time. Yes, time is a beautiful commodity and how we manage the time at hand, says a lot on about as to how we manage our lives. The big idea on time is that once its lost it can never be regained”- a no brainer on that one right; but how many of us do really care.

Presently, it's not a mere statistic that people are more stressed than ever. Ironically, this is happening at a time where the mankind has seen more comforts at the press of a button than at any other point of time in the history.

“Time-management”- the buzzword for effective living, and time an important resource - a nonrenewable one at that, waits for none.

Peter Drucker, the management expert put it up so well than i ever can when he stated “ There is nothing so useless as doing efficiently that which should not be done at all” we lose on time when we say YES to all the tasks at hand without prioritizing them and just go with the tide. And also, we feel that there are way too many fires around us which we have to put out than spend time in improving our own self. Many of us rant that there is no time for improvising things which is like saying we have no time to fill our fuel tanks as we have gone a long way... eventually this attitude will rub us wrongly. The hidden secret here is self-improvement, improvement in managing the time we have on our hands.

Here's a small list of things that most time- efficient people would swear by

- Getting up early - you'll have enough time to reflect on where you stand and where you are heading to, hence helps you to manage life.
- Have a to do list- either in a small journal which you can carry or a mental to do list will also do wonders- a few minutes and you can fine tune the day.

- Take some time out in improving on things which you think you need improvement- stay realistic and work on them.
- Set a goal-not focusing on a single aspect that is working, but try and have a 5 year goal in your personal, financial, spiritual and any other arena, which matters for your inner joy and prosperity, Walk towards that goal every day of your life which will fill your day with a purpose and it said “The purpose of life is a life of purpose”- so very true.
- Believe in “There is always a tomorrow” don’t dwell on the failures of today as there’s always a hope in the form of another day, another chance... and as we age we won’t repent on the things we wronged but for the things we did not dare...

So let us put into practice these little jewels of wisdom and move from being to doing. Managing the time we have on our hand shall see us through rough waters and once it gets into our skin we shall see our work done by the gods themselves and our days will turn from being stressful into being blissful.

New facilities at hospital

VIJAYPUR, DHNS: Water Resource Minister M B Patil will inaugurate three unique services at BLDE Hospital on April 29 at 9:00 am, informed BLDE University Vice-chancellor M S Biradar.

One of the units to be inaugurated is advanced Skin and Dermatology Research and Service Centre come up at a cost of Rs two crore. The unit is expected to cater to the skin problems of children and also offer cosmetic treatment. It would have modern Laser, Ultra violet and other machinery for treating psoriasis and white patches of skin. Another facility that would be inaugurated is the Micro-Biology Laboratory worth Rs one crore. The lab will help researchers to undertake researches related to HIV, Hepatitis, Brain Fever and other fatal diseases. The third facility would be addition of 21 more beds to the ICCU and CCU wing of the hospital which has already 133 beds, he stated in a press release.

New facilities inaugurated at hospital

VIJAYPUR, DHNS: The competition in health service could be sustained by providing the best health services at affordable cost, opined District In-charge Minister and BLDE Association president M B Patil.

Speaking after inaugurating a modern Skin & Dermatology Research and Treatment Centre, Micro-Biology Laboratory and additional 21 beds at the ICC and CCU wards of the BLDE Hospital here on Saturday, he said that earlier, all important medical services and treatments were not available in the city. But times have changed as a number of super specialty hospitals offering every kind of health service have been established in all district and even taluk headquarters ensuring necessary health services.

He claimed that the BLDE Hospital that has been providing health services for the last 30 years, has been upgrading to ensure best health care to the people. He said that the ₹ five crore worth new facilities added to the hospital would help the people in a big way. He also hoped that the facilities would boost research in a big way. BLDE University Vice-chancellor M S Biradar, BLDE Association Vice-president B R Patil Lingadalli and others were present.
