## Editor's Note....

Dear Readers,

It is a pride moment for all of us that BLDE (Deemed to be University ) has been accredited with NAAC 'A' grade. This is a great achievement and the credit for this huge success goes to all the stakeholders including students, faculty, alumni and administrators, who have contributed through their efforts to make our University a Centre-of-Excellence in Higher Education.

Accreditation grade underlines the standard of our Institution in the field of Quality Teaching, Research & Development that is offered to its students.

The NAAC accreditation grade of the University has increased our responsibility manifold to not only perform well in future but also to contribute in the exercise of health service by preparing the next generation of professionals to Research, Innovations and Community service.

Regards,

**Dr. Sumangala Patil**

## Students Writes...

“There is nothing so easy to learn as experience and nothing so hard to apply”

The day I stepped inside the campus of the BLDE, I started to grow. The growth, which was so optimistic that it held my passion and converged it to focus on towards my goals. Maybe it was the aura of BLDE I had been surrounded around.

Every day seemed like a new opportunity giving me chance to grab it.

Every morning had some freshness in it.

Every day my desires to learn and to keep going would make me enthusiastic.

Every night I would be satisfied, that I was learning, I was becoming better...

And I started to choose me over anything else, What I wanted was just to become better, better than my previous self.

Every day my reflexes would choose good, as there was nothing bad to choose over...

Every day started becoming better and better.

Every day my cravings urged for more knowledge.

Nothing could have been less perfect than the life I had been experiencing in BLDE...

Nothing could ever replace the experience I had here..!!

“Anything is possible when you have the right people there to support you.”

I always had my ‘TEACHERS’ who encourages me for our short victories and tells yes, you can do even better than this. Maybe I am lucky enough to get have teachers who keep on inspiring, who keeps on telling me to have faith in myself Ev-

ery time, whenever I found myself in dilemma. I am grateful to be part of BIDE that, I got my motivation, which tries to pull me out of my boundaries and help me breathe.

Every day I experience on this campus helps me to learn about life, teaches me the skills for surviving, and allows me to keep it simple. Absolutely everything is simple unless we start entangling to make it complex. Experience makes our learning simpler. And practice gets the best out of it.

“Today is a milestone. It tells you how far you have come. Keep learning, Keep trying keep accomplishing and keep venturing on through your journey.”

The place I have got into made my blurry vision clear towards my goal.

The place I have got into makes me grow every day.

The place I have got into has given me the best people that, I never wish to break contact with.

The place I have got into has been making my learning less difficult, the improvement I have been experiencing in myself, it’s the best experience BLDE has given me till now.

**Dr. Arun Pandey**  
Surgery, PG-2nd Year

Not to boast but it is a well-known fact that BLDE is par excellent. It is really difficult to find a home away from your real Home, but the teacher & the staff over here always made us feel this place like a home.

Although there is a big list of experience to share but to mention a few stressing on my brain and recollecting the memories, one of the best experience. I remember was during the orientation programme when we had just entered the college. In the orientation programme we were taught to give CPR that is cardiopulmonary resuscitation, which is a life-saving technique that is useful in many emergencies, such as a heart attack or near drowning, in which someone's breathing or heartbeat is stopped. The CPR was taught on mannequin that were customized to be worked upon as real patients.

Adding on to this experience, i would also like to appreciate about the world class skills lab in our campus. There are mannequin for every department and the different types of cases that we generally see in wards. A few to mention, during my surgery postings we were taken to the skills lab and were made to palpate and differentiate between breast lump and carcinoma of Breast. During our pharmacology practicals we were taught to give i.v, i.m, subcutaneous and intradermal injections. This experience just did not add up to my theoretical knowledge but also helped me in gaining practical knowledge. As

I believe medical profession is actually 40% of theoretical knowledge and 60% of practical knowledge.

I am really proud to be a part of this medical college as it provide us proper sources and different dimensions of learning.

Moving further, as I have already mentioned about the academics, this college not only helps

us in academics but provide overall growth and development of the students by conducting it. Every year the fest that we love to attend and eagerly wait for.

The fest provides us a different spectrum of thinking and forces us to bring out the best version of ourselves and out show our talents that are hidden from this world. The fest that is conducted is not just a cultural fest but also sports fest. This fest helps us to learn about sportsmanship and neck to neck competition. In the fest we not only get entertained but we experience that strength and bond with in our batch.

Although there are many more experiences to share but these are the best experiences in BLDE that have actually made home in my heart.
