The Constituent College

Shri B. M. Patil Medical College, Hospital & Research Centre, Vijayapura

## **Report on Guest Lecture Series organized by the Department of Physiotherapy on the eve of World Physiotherapy Day:**

World Physiotherapy Day (World PT Day) is a global healthcare event celebrated on the 8th of September every year since 1996, commemorating the date of the World Physiotherapy Foundation in 1951. This day serves as a homage to all the physiotherapists and the services they render, achieving the ultimate goal of a symptom-free movement at basic to complex physical activities in patients and the healthy alike.

### **Significance of World Physiotherapy Day - World PT Day:**

Everyone values the ability to function as independently as possible during everyday life. Patients and fitness enthusiasts typically seek out physical therapy services for physical impairments associated with movement disorders caused by injury, disease, or health-related conditions that interfere with their ability to perform or pursue any number of activities that are necessary or important to them.

### **World Physiotherapy Day 2023 Theme:**

Arthritis is the theme for World Physical Therapy Day 2023. Rheumatoid arthritis and axial spondyloarthritis are two types of inflammatory arthritis to be highlighted. In view of the above theme, a guest lecture series was organized by the Physiotherapy Department. The details of resource persons are mentioned below.
