Feedback from the participants:

- Overview of Form Builder functionalities, including rules, and Draft Mode
- Understands about Its control elements have the following functions: Form erasure, i.e., deleting all form elements. Form upload from JSON file. Downloading form layout as JSON file.
- Helpful of Hands on training on Form builder and Draft mode & brief live mode.
- Understands the purpose of The Form Builder provides syntactic sugar that shortens creating instances of a Form Control , Form Group , or Form Array . It reduces the amount of boilerplate needed to build complex forms.
- Known to the Roles and Privileges, providing insights into team management and collaboration details, specific for research.
