

BLDE

(DEEMED TO BE UNIVERSITY)

Declared as Deemed to be University u/s 3 of UGC Act, 1956

The Constituent College

SHRI B. M. PATIL MEDICAL COLLEGE, HOSPITAL & RESEARCH CENTRE, VIJAYAPURA

**A Report on Guest Lecture  
“IMPORTANCE OF RESEARCH”**

**Organized by  
R & D Cell, BLDE (DU) in Collaboration with IQAC**

**Date: 26/10/2023**

**Venue: Dept. of Medical Education**

**Participants:** Academicians, Faculty, Research Scholars, PG Students from all disciplines.

**Resource Person:** Dr. Abdul Razzaque Ahmed, M.D., D.Sc., M.P.A, FRCP, Ibn Sina Professor of Dermatology, Tufts University School of Medicine, Director, Center for Blistering Diseases, Boston, MA, US.

The guest lecture started with the welcoming to the speaker and the team by Dr.Chandrika D., Dy.Director R & D Cell, BLDE (DU). Dr.M.M.Patil, Director, R & D Cell, BLDE (DU) addressed few words about the important of **“IMPORTANCE OF RESEARCH”**. Dr.Arun Inamdar, Pro-VC welcomed and conveyed brief introduction about the Resource Person of the guest lecture to the group.

Speaker of the today's session was briefed about the guest lecture on **“IMPORTANCE OF RESEARCH”**. He started with ppt with brain storming to understand about research.

**GOAL:** To make everyone in the audience -Think---Reflect

### **Research is –**

Research is defined as the creation of new knowledge and/or the use of existing knowledge in a new and creative way so as to generate new concepts, methodologies and understandings. This could include synthesis and analysis of previous research to the extent that it leads to new and creative outcomes.

### **Application of Research-**

A creative process and a systematic work which is undertaken in order to increase the knowledge which can be but not limited to society culture human or any specific domain is called research. Research is a process which is used to establish facts or confirm them and the results of the work which has been done previously or address existing problems.

They can also be supportive theorems or new theorems or even new theories. It could also be an expansion of a work which has been done in the past also can be used to develop further knowledge on a particular topic address the topic in a new way using modern technology and modern examples.

Sometimes it is only done to increase the knowledge about a particular topic in a particular domain or industry. There are many types of research that are used in many industries write from finding a new you fact to reach performing the old fact with the help of new technology.

Different methods can be used to conduct the research depending on the nature of the research and the approach that has been taken to address the research. The different types of research such as

Every aspect of human life ---living & nonliving

- All creatures
- Non-living entities ---minerals, coal

- Society, nation, continent
- ENTIRE PLANET concept of global village

Because research has wide applications in every domain it finds applications in almost every industry.

Applied research is a type of examination looking to find practical solutions for existing problems. These can include challenges in the workplace, education and society. This research type uses empirical methodologies, such as experiments, to collect further data in an area of study.

#### **RESEARCH can be conducted at –**

1. Institutional ---Academic (Univ) ---Indian Institute of Science & Indian Institute of Tech.( (Think Tanks)
2. Independent Research Centres ---Tata –Cancer ( Birla –BITS)
3. Non-Institutional ---Ashram (Madarasa, Muktab, Jamia)

The most recent fashion in the policy-level promotion of excellence in academic research seems to be the launching of funding programs directed to young and promising (postdoc level) researchers with the purpose of assisting them in establishing their own research profile at this allegedly crucial and fragile career stage.

#### **WHO BENEFITS FROM RESEARCH**

Beneficiaries are those who are likely to be interested in or to benefit from the proposed research. List any beneficiaries from the research and give details of how the results of the proposed research would be disseminated.

1. Individual ---Student/Mentee
2. Teacher ---Mentor –Good researcher –Must be a scholar
3. Define Scholar ---Difference between inch & mile (Harvard)
4. Society ---Country ---Advance (Improvements & Prosperity)
5. Civilization ---Mohengadaro/ Gandhara (Ashoka)/ Mesopotamia (Iraq)/ Machu Pichu (Peru)

#### **WHO PROVIDES IMPORTANCE TO RESEARCH?**

Research cuts across all sectors of the economy and all fields of knowledge. Professionals usually conduct research to find solutions to problems in their professions or just to generate more insight that can improve the understanding of a particular subject matter.

- Individuals
- Society ---Value placed on research & researchers
- Reward those who conduct research –recognition ( Financial support)
- Discoveries ---Result from research (Progress –Scientific, Medical, Cultural, Social, Etc).

#### **CONSEQUENCES OF NEGLECTING IMPORTANCE OF RESEARCH:**

- Individual ----Educated ---Poor performance (Unemployed & Poor thinker)
- Society ---Looses (Lack of Entrepreneurship)
- Chaos --No social progress/ No political consciousness/ Breeds anarchy rulers

Neglecting the importance of research can lead to significant consequences, including: poor decision-making, loss of opportunities, and decreased innovation. Research provides valuable insights and data that can inform strategies, help identify trends, and avoid costly mistakes. By prioritizing research, organizations can gain a competitive edge.

## CRITICAL IMPORTANCE OF ENVIRONMENT

A research environment as including: 'shared values, assumptions, beliefs, rituals and other forms of behaviour whose central focus is the acceptance and recognition of research practice and output as valued, worthwhile and pre-eminent activity.

Research not possible in a vacuum

Environment ---Rich in scholars ---Multiple fields

---Healthy environment

---Freedom ---no walls/no barriers

Mind & thought do not work

---No bias/prejudice ---quality speaks itself

---Evaluation ---Multiple

-Open

-Transparent

Nepotism, Racism, Injustice, Partiality, Bribe ---No research/progress

Big roads, high rise buildings ---not evidence or features of intellectual development

## MOST IMPORTANT BENEFICIARIES

Like it or not, the primary beneficiary of research funding is the researcher, who has managed to deepen their understanding by working on a particular dataset. First line beneficiaries of research would then be company shareholders, rather than the public at large.

### ➤ Mentee/Student

-Create spirit of inquiry

-Quest & hunger for knowledge

-Gather information, analyze ---synthesize ideas (Frame new questions)

-Build character ---honesty, transparency, equality

---Learning skills ---develop skill sets

---Lifelong journey of exploration (Become future mentor )

## FINANCIAL ASPECTS:

Good research mandates sound stable funding from Commercial/Industrial Research ---Meets market goals and it should academic research have financial goals from patents & Business ventures.

Managing financial aspects plays a very vital role in progress of any good business. Sufficient funds are necessary to meet daily expenses to purchase long term assets for the company's requirement accordingly; also funds should be there to deal with future unforeseen over costs which may arise. Project financial management, sometimes referred to as project accounting, is managing a project's financial aspects including its cost, revenue, and profit. To this end, it brings together planning, estimating, budgeting, funding, managing project expenses, and billing.

## EXAMPLES OF IMPORTANCE:

- Medicine ---Each society has unique problems ---No one else will research them to resolve them
- Social Sciences ---Problems of society ---Compartmentalization dangerous---Apartheid
- Education ---Research to determine need ---unemployment resolved ---Constant evaluation of quality
- Environment ---Needs/costs/consequences e.g. deforestation
- Agriculture ---Food supply/distribution/consumption ---health/obesity/ carbon emissions

## CONCLUSION

Research is the backbone of society, Foundation for ---Intellectual growth, Progress, Innovation, Meet changes & challenges with time & society, Develop Bank of Thinkers & Value & Support comes from society.

The session concluded with vote of thanks by Dr.Jayaraj, Pro-Chancellor with valuable words to the participants for the importance of research and offering certificates and bouquets to the speaker.

### Feedback from the Participants:

- Gust lecture fuelled by curiosity, we get curious, ask questions, and immerse ourselves in discovering everything there is to know.
- Learning is thriving. Without curiosity and research, progress would slow to a halt, and our lives as we know them would be completely different.
- Research can enhance the ability of the student to come up with information about a topic by deeply investigating the subject matter.
- The research provides a path to prosperity and progress.
- Gathered knowledge through research is a foundation for attaining and learning new knowledge and skills.

Thanks
